

We're more than just rulers!

Quilter's Rule™

Quilter's Rule 6" Right Triangle

The Quilter's Rule 6" Right Triangle is specially designed as an ideal measuring companion for use with a rotary cutter. Simple and easy to use, this triangle is great for making 45 degree triangles and diamonds from 1" to 6".

Care of Ruler: Clean with soap and water or a non-ammonia glass or window cleaner.

How to Use:

- 1.) Using the base (the edge opposite of the 90 degree corner) of the Right Triangle, mark or cut with a rotary cutter across your fabric for a straight edge.
- 2.) Simply slide the Right Triangle down from the mark or cut just made to the desired triangle size and mark or cut along the two outside edges to complete your fabric triangle cutout.

For Right Angle Triangles on the Bias

Place the Right Triangle with the top 90 degree corner in the bottom left corner of your fabric. Mark or cut the desired triangle size along each of the outside edges of the Right Triangle. Slide Right Triangle down at a leftward angle so the base of the Right Triangle is at each of the marks or cuts just made. Mark or cut along the base of the Right Triangle completing your fabric cutout,

For 45 Degree Diamonds

Fold your fabric in half. Using one of the 45 degree diamond corners of the Right Triangle, place the desired diamond size on the fold of your fabric. Mark or cut along the two outside edges of the Right Triangle. Unfold your fabric diamond cutout.
